

Getting Manifest Online — In Plain English

What we're setting up, why it's *not* WordPress, and answers to your domain & email questions.

PREPARED FOR	DATE	PREPARED BY	PRICES
Akshay Kapoor	7 July 2026	Manifest website project	GoDaddy Australia (AUD)

We've built you a **brand-new custom website** with live listings and smart client tools (instant valuation, an AI chat assistant, and stamp-duty / borrowing / rental calculators). To put it online and switch those tools on, it needs a **proper hosting plan** — a different GoDaddy product from the free one you're on now.

WHAT YOU'RE LOGGED INTO NOW

Websites + Marketing — FREE

GoDaddy's own **drag-and-drop builder**. Fine for a quick DIY page, but it **cannot run our custom site or the smart tools**. Not what we need.

WHAT WE ACTUALLY NEED

Web Hosting — Deluxe

A separate GoDaddy product: **real hosting** where our site and tools live. Includes your **domain** and **email free**, plus the security padlock (SSL).

Why not the cheaper "WordPress" hosting?

WordPress hosting **only runs WordPress websites**. Your new site is custom-built, with its own tools that need an open, flexible space to run. Your **old site was a WordPress template** — which is exactly why it couldn't offer these tools. Proper **Web Hosting** is what makes them possible.

The options & what they cost (GoDaddy Australia)

PLAN	PRICE / MONTH	RUNS OUR SITE + TOOLS?	WHAT YOU GET
Web Hosting — Deluxe ★ Our recommendation	\$8.95 1st yr · then \$27.95	✓ Yes	10 sites, 50 GB, cPanel, free domain + email + SSL
Web Hosting — Economy Budget option	\$6.95 1st yr · then \$18.95	✓ Yes	1 site, 25 GB — works, but less room to grow
Hosting for WordPress — Basic Cheapest, but wrong fit	\$6.95 1st yr · then \$22.95	✗ No	WordPress-only — cannot run our custom site or tools

Backup option: if Deluxe ever falls short, a **VPS (\$13.95/mo)** guarantees everything runs — we'd only switch using the 30-day money-back guarantee, at no extra cost.

Your question: can we cut the domain cost?

Yes — you're **not locked in**. We can keep your domain, move it to a cheaper provider (same name, lower yearly fee), or use the **free first-year domain** included with Deluxe. Changing it later is easy — **no rebuild needed**.

Your question: the monthly email charge

Right now email is a **separate paid add-on** (GoDaddy charges from **\$3.50 per mailbox each month**). Web Hosting Deluxe **includes email free** — so we cancel that add-on and your email keeps working at **no extra cost**.

Bottom line — one purchase does it all

Buy **Web Hosting → Deluxe** (under Manifest's account). It replaces the free builder, hosts the real site + tools, includes your **domain + email**, and **removes the monthly email charge**. Then share the cPanel login and we take it live — with a 30-day money-back safety net.
