

Your personal buyer, **in your pocket.**

The one app that walks a first-home buyer through the entire purchase — from "am I ready?" to the day they get the keys — in one place they can actually trust.

THE GAP WE'RE FILLING

No app holds a buyer's hand from start to finish. People stitch the biggest purchase of their life together from a dozen sources — and never know who to trust. **This app becomes the one they trust.**

STAGE
Concept · v1 scope

One journey, always in progress

The app opens on the buyer's own journey — a live progress tracker, not a menu. Beside it, a mentor that answers the questions they're too nervous to ask the seller's agent.

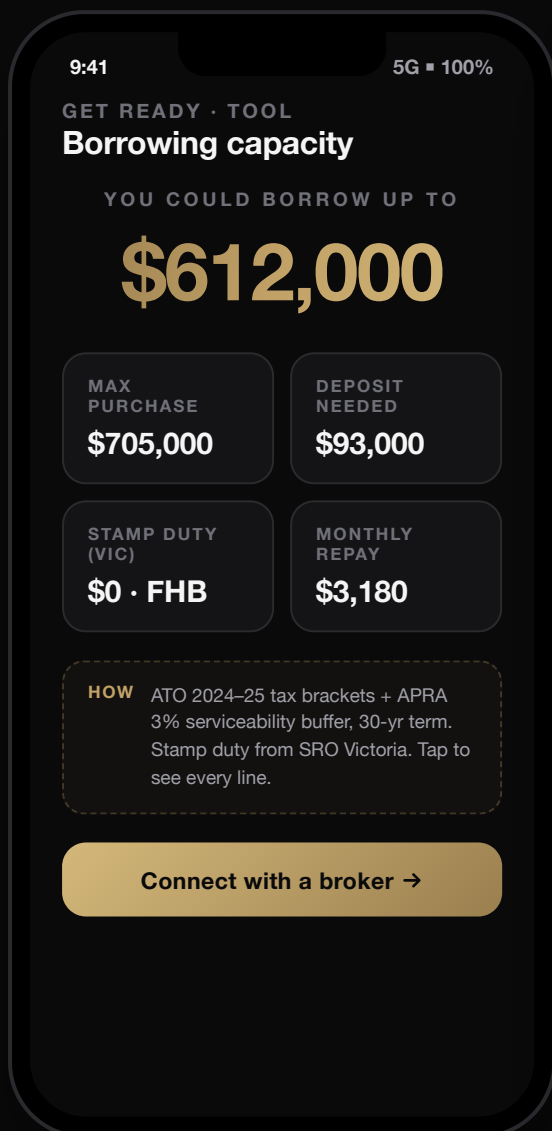

Home — the journey. Seven stages, a readiness score, and the single next step. Reminders keep it moving.

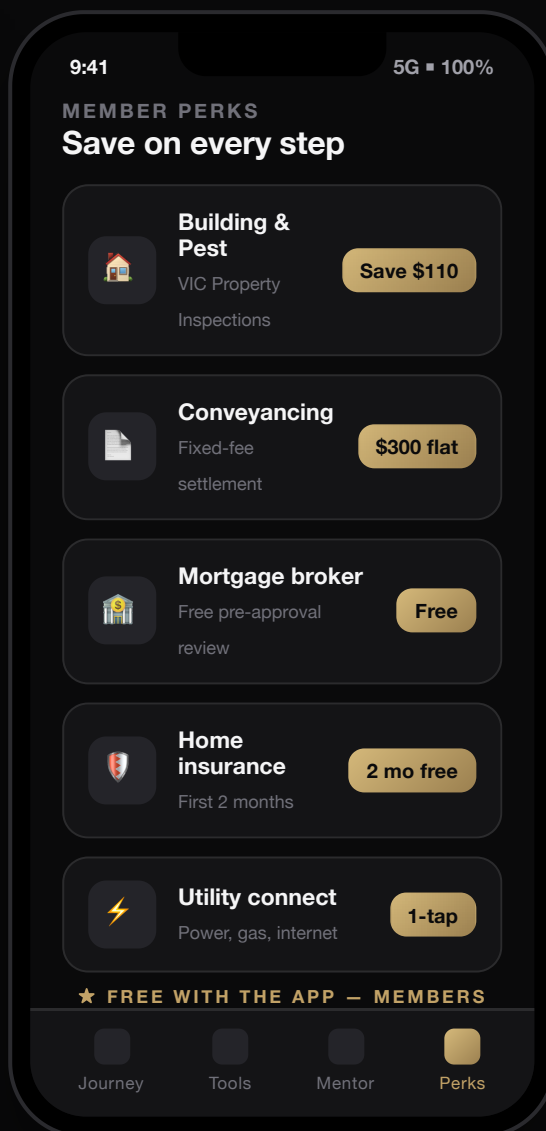

AI mentor. Grounded answers that **cite their source** — the anti-ChatGPT. Hands off to a real Manifest expert for the big calls.

Broker-grade numbers. Real member savings.

Every calculation is deterministic and shows its working. And the reason buyers stay: member discounts on the services they need anyway.

The tools. 13 calculators — borrowing, deposit, LMI, stamp duty, yield. **Provably correct**, every number sourced.

Member perks. Real discounts from a **vett**ed partner network — the buyer saves more than we earn. This is the hook.

Seven stages, start to keys

Each stage carries its own tools, interactive checklists and reminders.

Nothing is forgotten, because the app remembers for them.

1

Get Ready

"Can I afford it — and what's my budget?"

Borrowing capacity · Deposit · Stamp duty · Budget · Savings tracker · Grants check · connect to a broker · Buyer Readiness Score

2

Find a Property

"Is this the right one — and is it fairly priced?"

Inspection checklist · Questions to ask the agent · Comparable sales · Suburb score · School zones · Flood/fire & development overlays · Rental yield · Resale estimate

3

Before You Offer

"How do I not overpay or get burned?"

Offer & auction strategy · Recommended offer range · Due-diligence checklist · Building & pest booking · Conveyancer · Finance-clause explained

4

Under Contract

"Am I on track to settlement?"

Progress tracker: contract signed → deposit paid → finance approved → inspections → **Section 32 reviewed** → settlement booked → utilities → insurance

5

Final Inspection

"Is the home as promised?"

Interactive checklist with photo capture — appliances, heating/cooling, hot water, fixtures included, damage since inspection, keys

6-7

Settlement & After

"Keys today — and settled in for the long run."

Settlement tracker · key collection · utility transfers · then **address-change reminders, maintenance schedule & a property-value tracker**

A system of action, not a chat box

A buyer can ask ChatGPT anything — and get words. This app remembers their purchase, proves its numbers, and gets them real discounts. That's the difference between advice and a co-pilot.

CAPABILITY	MANIFEST APP	GENERIC AI
Remembers your journey & dates	✓ Timeline + reminders	✗ Forgets
Numbers you can trust	✓ Deterministic + sourced	✗ Can hallucinate
Real property & overlay data	✓ Comps, zones, overlays	✗ Not tied to the address
A real human when it matters	✓ One tap to Manifest	✗ None
Saves you money	✓ Member discounts	✗ None

Trust, made visible

Every figure shows "how we worked this out" with its official source (SRO, gov data). AI answers cite the comp or overlay behind them. Nothing is a black box.

Manifest as the backstop

The app is agency-neutral, but a real, reviewed Manifest expert is one tap away for the high-stakes calls — credibility a chatbot can't offer.

The money is on the other side

A first-home buyer with no spare cash gets the full journey, tools and everyday mentor for free. We earn from the supply side and from optional power features — never from the anxious buyer.

- 1 Partner network** LIVE V1 · CURATED

Vetted building & pest, conveyancers, brokers, insurance, utilities. Buyers get discounts; we take a referral margin. The two-sided flywheel and the reason they stay.
- 2 Paid AI boosts** BUYER-SIDE

Optional 1-day / 1-week / 1-month passes for heavy AI at the moment of stress — contract-clause review, building-report summaries, negotiation coach, auction-week mentor.
- 3 Agent & broker leads to Manifest** DIRECT WIN

Every "talk to a human" tap is a qualified, high-intent lead. The app is a lead engine for Manifest's core business — it pays back before partner revenue does.
- 4 Business portal + white-label** V2

Self-serve partner sign-up with referral tracking, then licensing the whole engine to other agencies as their branded buyer app. Manifest becomes a platform.

Two portals. The buyer app (v1) + a business portal where partners publish offers and referrals are tracked (v2). Everything runs under a ≤ **\$500/month** cost cap — premium property data is deferred to a paid tier so free stays sustainable.

Ideas that make it sticky

Extensions of Akshay's core idea — the ones marked ★ are the high-impact bets for the early roadmap.

Buyer Readiness Score

One confidence meter that fills as Stage 1 completes — turns "am I ready?" anxiety into a game with a clear next step.

Document Vault

Store the contract, Section 32, building & pest reports in-app — and let the mentor read them: "any red flags here?"

Ask-before-you-sign

AI contract-clause explainer with red-flag detection — short cooling-off, finance-clause traps, unusual special conditions.

Auction-day companion

Walk-away price locked in beforehand, live bid-increment calculator, and calm-nerve prompts so no one over-bids.

Property School

Bite-size lessons ("what's a Section 32?"). Drives daily engagement, app-store keywords and SEO growth.

Invite-a-friend

Both sides unlock a partner discount. Buyers are surrounded by other buyers — the cheapest growth channel there is.

Shortlist compare

Save several properties and compare price, yield, overlays and suburb score side-by-side.

Post-settlement stickiness

Maintenance schedule, value tracker, and a refinance nudge years later — re-engagement and a fresh broker lead.

GETTING IT BUILT

From concept to your phone

Reusing the website's proven calculators and backend, a private beta is a few weeks away — not months.

PHASE 0 Knowledge base + app scaffold + design system · done / underway ~1 wk

PHASE 1 Stage-1 tools + journey engine · checklists, timeline, reminders ~2–3 wks

PHASE 2 AI mentor + remaining calculators · all money verified ~2 wks

PHASE 3 Find-a-property + data · overlays, comps, school zones ~2–3 wks

PHASE 4 Partner perks + Stages 3–7 + polish ~2 wks

PHASE 5 TestFlight / Play beta → your phone ~1 wk

BETA ON YOUR PHONE

~4–5 weeks

Stages 1–2 + tools + mentor

POLISHED V1

~10–12 weeks

Full journey · iOS & Android

RUNNING COST

≤ \$500/mo

Data deferred to a paid tier

What we need from you

- **The brand name** — a few candidates are ready to react to (this is bigger than the agency).
- **Seed partners** — your real building & pest, conveyancer, broker and insurance contacts to launch the perks.
- **A thumbs-up on the direction** — then we start Phase 1.
